DETAILED ACTION

1. This action is responsive to the communication filed 11/29/2011.

Reasons For Allowance

2. Claims 1-27 are allowed.
3. The following is an examiner's statement of reasons for allowance: The first prior art of record (US Patent No. 6,453,345 b2 by Trcka) does not teach nor suggest in detail, as to a display unit that displays an association chart indicating the terminals within the network and that superimposes additional objects on the association chart, the additional objects being generated in accordance with the display, the additional objects being overlapped on the association chart in a chronological order corresponding to the respective times when the action contents are actually communicated, wherein the additional objects includes the type of operating system employed by the client, the type of operating system employed by the server, an account name of a user accessing the client, and an icon representing the account name. Robinson merely teaches a network security and surveillance system passively monitors and records the traffic present on a local area network.

The second prior art of record (U. S. Publication No. 2003/0009705 A1 to Thelander et al.) teaches a method and system for controlling the power management profiles of computers connected through a network. Thelander fails to teach a display unit that displays an association chart indicating the terminals within the network and that superimposes additional objects on the association chart, the additional objects being generated in accordance with the display, the
